

Demand Side Grid Support (DSGS) Program DSGS Option 4 New Technology Proposal

Instructions:

VPP aggregators may submit a proposal using this form to qualify for other load flexibility dispatch resources as eligible for participation in Option 4. Complete one form for each proposed technology and submit to the DSGS program at <https://dsgs.olivineinc.com/upload/>. Specify a Submission Type of "Option 4 New Technology Proposal." For more information on Option 4 eligibility requirements, see Chapter 6 Sections A & B of the [DSGS Program Guidelines](#) or visit the DSGS Program website at dsgs.olivineinc.com.

Provider Name:

Provider Contact Email:

All fields are required unless otherwise indicated.

1. Resource Description

Provide a brief description of the proposed Option 4 resource.

2. Load Reduction Capabilities

Describe how the resource will be dispatched to provide load reduction incremental to resource adequacy during a program event.

3. Device Monitoring

Describe how the device load will be monitored.

4. Committed Capacity Nomination Determination

Describe how the committed capacity nominations for this technology will be determined. For more information about committed capacity nominations, see Chapter 6, Section D of the [DSGS Program Guidelines](#)

5. Program Participation Barriers

Describe any barriers impeding the proposed aggregation from participating in other existing programs (such as time-of-use and resource adequacy for qualified demand response) for encouraging load reduction.
